## BID SPECIFICATION FOR BROADCAST CRT MONITORS

MODEL NUMBER  
**BVM-D9H5U**

INSTRUCTIONS:

REMOVE THIS COVER PAGE AND ADD TO REQUESTS FOR QUOTATION AND PROPOSALS. THE OBJECTIVE OF THIS BID SPECIFICATION IS TO ASSIST YOU IN CLEARLY SPECIFYING THE SONY PRODUCT IDENTIFIED ABOVE, AND ENSURING THAT THE BUYER IS WELL INFORMED OF THE HIGH STANDARD OF PERFORMANCE THAT IS TO BE EXPECTED OF A SONY PRODUCT. THE INFORMATION IN THIS DOCUMENT IS CURRENT AS OF JUNE 2002. PRODUCT SPECIFICATIONS ARE SUBJECT TO CHANGE WITHOUT NOTICE.

## **1.0 General Information**

The purpose of this information is to provide the specification for a product whose primary purpose is the reproduction of video information for one or more viewers.

This reproduction of this information is to be accomplished via a direct-view CRT monitor. This document provides the minimum specifications for this device.

The performance comparison of displays is not only technical in nature, but is also subjective to the user, when viewed in the final display environment. It is recommended that devices meeting the requirements of this specification be compared in the user's application and environment, if possible.

## **2.0 Description**

This product shall be classified as a direct-view CRT color monitor, or production display. This device shall be directly compatible with video sources, without the use of external devices to provide this compatibility.

This device shall employ the use of an HR Trinitron CRT for optimum display of high-resolution sources.

This device shall employ a shape that allows for rack mounting in a 19" EIA standard rack, using a standard rackmount kit. This device shall be encased in a metal enclosure for durability. A stand shall be provided to tilt the monitor in field applications.

## **3.0 Source Compatibility / Suitability for Application**

### **3.1 Compatible Display Formats**

- SMPTE 170M NTSC
- SMPTE 240M 1035 line HDTV
- SMPTE 274M 1080 line HDTV
- SMPTE 296M 720 line HDTV
- ITU 601 colorimetry
- ITU 709-2 colorimetry

### **3.2 Compatible Input Formats**

- SMPTE 170M NTSC Composite
- ITU 601 PAL Composite
- SMPTE 259M 525/625 Component serial digital video
- SMPTE 292M HD Component serial digital video
- SMPTE 305M SDTI MPEG 2 Video
- IEEE 1394 serial digital video

## **4.0 User Interface / Controllability Information**

Control of this device shall be accomplished through one of the following methods:

Front Panel Control  
Parallel Remote Control  
RS-485 Serial Control

The front panel control shall provide access to on-screen displays that allow control over all monitor setup functions. The front panel shall also offer storage of monitor settings using a Type II PCMCIA flash card.

The optional parallel remote control shall provide access to all monitor setup functions.

The serial control jack shall employ the use of a standardized device control protocol that is understood by external control unit available as an accessory. This control jack shall accept bi-directional serial commands that provide full control over the device.

All monitor control functions shall be available for control through the serial control jack. This jack shall be capable of connection to an optional serial controller that is capable of controlling up to 32 monitors. This optional controller shall be capable of storing monitor settings using a Type II PCMCIA flash card.

## **5.0 Performance Specifications**

This device shall employ the use of an HR Trinitron CRT with a minimum CRT resolution of 340 lines in 16:9 mode and 450 lines in 4:3 mode.

This device shall be equipped with color temperature alignment system for easy set-up with industry standard color analyzers.

This device shall employ built-in auto setup, allowing for automatic adjustment of chroma and phase.

This device shall provide color temperature stability using a beam current feedback circuit.

This device shall employ on-screen display of time code for editing and duplication references.

This device shall support switchable aspect ratios of 4:3 and 16:9, and shall offer a 4:3 area marker.

This device shall be equipped with a three color tally (red, green or amber: R+G).

This device shall be equipped with an audio amplifier and speaker to provide audio support.

## **6.0 Dimensional Information**

This device shall employ the use of a 9" diagonal (7.63" viewable) CRT.

This device shall have maximum cabinet dimensions of 8.63 inches high by 8.63 inches wide and 17.88 inches deep.

This device shall not weigh more than 21 pounds.

## **7.0 Connectivity Information**

This device shall provide for direct connection of a single source device, and shall be built with expansion capabilities (3 slots) for additional source devices, with a maximum of 7 directly connected sources. This connection shall include the following:

Component Video or RGB Video on BNC Connectors with loop-through

Optional source connections shall include the following:

Composite Video on a BNC Connector with loop-through

S-Video on two BNC Connectors with loop-through

Component Video or RGB Video on BNC Connectors with loop-through

SDI Video on a BNC Connector with loop-through

HD-SDI Video on a BNC Connector with loop-through

## **8.0 Power Requirements**

This device shall accept power at 100–240 VAC at either 50 or 60 Hz, or 12 VDC using a 4-pin XLR connection or optional battery.

This device shall consume no more than 85 watts in AC mode and no more than 85 watts in DC mode.

Power to this device shall be supplied via a detachable standard power cord that is readily available for replacement from local suppliers.

## **9.0 Safety Compliance Information**

This device shall be fully compliant with the following standards:

UL 1950  
CSA 950 (cUL listed)  
FCC Class-A  
IC Class-A  
DHHS  
DNHW

## **10.0 Warranty Information**

This device shall carry a 2-year manufacturer's warranty. Authorized servicing dealers of the devices' manufacturer shall perform warranty service.
